

Save My Spot

Losing your place is annoying

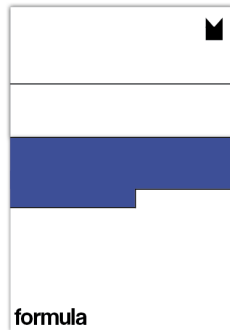

Articles have more than one interesting spot

“There’s a native-app HTML5 API for that.”

formula

Build The News Demos

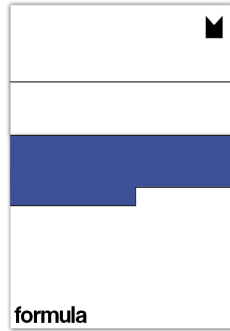

Features:

- Save spot position in local storage (Demo 1)
- Allow for multiple saved spots on a page (Demo 2)

Demo tech:

- local storage
- initializr's Bootstrap boilerplate
- font awesome

Roadmap

- **UI**
 - smooth scrolling
 - onboarding function e.g. append Save My Spot to viewport bottom
 - “favourites” page to collect saved spots from multiple stories
- **Personalisation / User Preferences**
 - set / clear localStorage via icons in My Placeholder menu
 - behaviour of page on-reload
- **Share saved spots across multiple devices**
 - Pocket for personal use (Sense Checking
 - e.g. send saved spots to other users
- **Publisher-friendly**
 - Add Save My Spot to any Webpage with a single line of JavaScript (like Google Analytics)
